Career Objective

Results-driven Cloud Engineer with 6+ years of experience designing, automating, and optimizing cloud infrastructure across AWS, GCP & Azure. Specialized in Linux Administration, Cloud automation, Infrastructure Migration and cloud security with a proven track record of reducing downtime by 80% and cutting cloud costs by 40% through intelligent architecture and automation. Seeking a role where I can drive cloud modernization, enhance platform reliability, and contribute to scalable, secure, and high-performing cloud-native systems. Passionate about solving complex infrastructure challenges and enabling engineering teams through automation-first strategies.

Profile

Cloud & DevOps Engineer experienced in building, scaling, and securing mission-critical cloud platforms across AWS, GCP & Azure. Proficient DevOps, System, and Cloud Engineer adept at orchestrating infrastructure across IaaS, PaaS, SaaS, and On-Prem environments. Experienced in steering resources within AWS, GCP, Azure and On-Premises setups, Proven ability to streamline application delivery through robust CI/CD pipelines and ensure efficient production management. Known for reducing operational overhead through automation, improving system resilience, and aligning infrastructure decisions with business goals. Strong collaborator with experience working across development, security, operations, and leadership teams to deliver cloud solutions that are reliable, cost-efficient, and future-ready. Passionate about continuous improvement, cloud-native innovation, and driving engineering excellence.

Technical Skills

- **Cloud Platforms:-** Amazon Web Services (AWS) Platform, Google Cloud Platform (GCP), Microsoft Azure. OCI (Oracle Cloud Infrastructure), Alibaba, Digital Ocean, OpenStack, Cloud Stack, OpenShift, Akamai (Lenode)
- **Networking:-** LANs, WANs, VPNs, NAT, Routing, Switching, TCP/IP, VLAN, STP/RSTP/MSTP, OSPF, BGP, Access Port, Trunk Port, ARP Table, DNS, VPC, Load Balancer.
- **Web Servers**:- Nginx, Caddy, Traefik, Apache, HAProxy
- **Databases**:- MySQL, PostgreSQL, Cloud SQL, AWS RDS, Azure MySQL flexible server
- **Applications:-** Kubernetes, Docker, Podman, Terraform, Ansible, Jenkins, Circle CI Argo CD, Helm, Istio, Prometheus, Grafana, Grafana Loki, Fluentd, Fluent Bit, Jaeger, Nagios, Git, Chef, Pulumi, Datadog, Wazuh, Suricata, Teleport, Zen Map, Snort, Metasploit Armitage, Nessus, Wireshark, Maltego, Acunetix, GFI Languard, Burp Suite, Network Simulator 2, Retina Network Security Scanner, Microsoft Office.
- **OS Platforms:-** Operating System Linux (including Red Hat Enterprise Server, Ubuntu 24.04 LTS, Fedora, Cent OS), Windows (XP, 7, 8, 8.1,10,11), Windows Server 2012 & 2016, Windows and Linux include x86-32 & x86-64-bit architectures. Proficient with the processes associated with Backtrack 5r3, Kali Linux 2.0, Fedora Spins Security LAB. Catchy OS, Open Suse, Rocky Linux, Alma Linux, Caprover, Dockploy, Rutipi
- **Other Skills: -** Security Command Centre, Azure Sentinel, IAM, AWS GuarDuty, AWS Migration Hub, Azure Migrate, GCP Migration Center, Firebase Studio, Network Security Management, Network Management, Vulnerability Assessment & Penetration Testing, Ethical Hacking, IDS/IPS, Anti-Virus Tools, Firewall, Desktop Support. G-Suite (Google Workspace) Microsoft 365, Zoho, Airtable, Jira, Trello, Slack.

- **Volume Managers:-** LVM (Linux), Ext4 (Linux), XFS, GPT (Windows), Sound knowledge of Hadoop Distributed File System (HDFS)
- **Virtualization Applications:-** VMware, VMware vSphere 5.5, Oracle Virtual Box, Hyper V, Proxmox.
- **Programming and Scripting Languages:-** C, C++, Java, Visual Basic, Python, Bash script
- **AI & Intelligent Automation Tools:-** ChatGPT, Google Gemini, GitHub Copilot, Vibe Coding, AWS Bedrock, GCP Vertex AI, Azure OpenAI, Darktrace, Cortex XSOAR AI Playbooks, Burp AI,Nessus AI Scanning, Notion AI, Zapier AI, Make.com AI Automation, N8n (Nodemation) AI-driven cloud optimization and anomaly detection systems.
- **IDE's & Vibe Coding:** Oracle Eclipse, VS Code, Zed, Android Studio, AWS kiro, Bolt.new, Google Antigravity, Cursor, Warp, Anthropic Claude AI, Open AI Codex.

Experiences

IT Support Executive Jan 2016- Jan 2018 Micron Systems Pvt. Ltd. (Buldhana – Maharashtra)

Desktop & Technical Support, Networking, Installation of Operating Systems and Configuring Software, Routers, Firewalls, Installing Printers.

IT Support & Security Executive Jan 2019 – July 2025 Anaxee Digital Runners Indore Pvt. Ltd. (Indore -MP)

Developed several processes to streamline IT Support Delivery and Resolution. Designed and install handheld Units, Network Equipment, resolved faults as soon as they occur and escalated critical problems to the necessary authority to be resolved immediately. Utilize Sugar CRM daily to track and work desktop support tickets such as hardware repairs, installing software, maintained user permission, Firewall Maintenance, Network Security.

Cloud & Devops Engineer Aug 2019 – Nov 2025 Anaxee Digital Runners Indore Pvt. Ltd. (Indore -MP)

As a Cloud Engineer at Anaxee, I manage and optimize multi-cloud infrastructure across AWS, GCP, and Azure, ensuring high availability, automation, and cost efficiency. I have led several end-to-end on-prem to cloud and cloud-to-cloud migrations, reducing downtime by 60% through blue/green deployments, zero-downtime DNS cutovers, and Terraform-driven IaC patterns. My work includes migrating monolithic systems to Cloud and CapRover, Dockploy, modernizing internal and customer-facing applications, and maintaining CapRover and Dockploy servers for containerized deployments. I oversee analytics migrations to BigQuery and Cloud SQL, improving reporting performance by 45%, and maintain internal tools servers, VM infrastructure, daily backups, and lifecycle automation. I manage DNS, domains, and SSL certificates, ensuring secure and uninterrupted service delivery, along with handling WordPress hosting on GCP with hardened security. I also maintain object storage systems (S3/GCS) with automated retention policies, ensuring compliance and long-term data protection. My responsibilities extend to VM maintenance, user and access management, performance troubleshooting, and overall cloud reliability engineering. Key achievements include delivering a zero-downtime CRM migration to GCP then on Azure that improved performance by 30%, reducing Azure + GCP cloud costs by 30% through autoscaling and resource right-sizing, and I also help train and onboard new DevOps and Cloud interns, guiding them through tools, workflows, and best practices. I maintain clear documentation for infrastructure, migrations, and internal processes to support team productivity. I work closely with developers and support teams to ensure smooth collaboration across projects.

Freelancing

As a Freelance Cloud & Web Solutions Engineer, I delivered a wide range of projects including web development, WordPress setup and customization, and technical writing. I supported businesses with email migrations across Google Workspace, Microsoft Outlook, and Zoho, along with complete DNS and domain management for seamless service transitions. I deployed servers for web and app hosting, assisted with Google Play Store application updates and release support, and resolved technical queries related to Firebase Studio, Airtable, and backend integrations. My work focused on providing reliable, secure, and scalable solutions tailored to each client's operational needs.

Certification

- EC-Council: Certified Ethical Hacker v8 2014
- Certified Information Security Expert (CISE-Innobuzz) 2014
- Certified Microsoft Specialist Exam 74-409: Server Virtualization with Windows Server Hyper-V
- Kaggle AI Agents Intensive Course with Google
- Google Cloud Skill Boost : Earned badges demonstrating proficiency in various Google Cloud

Technologies through hands-on labs on the Qwiklabs platform & Other Cloud and Gen AI Related Certificates

Academic Project

"Cyber Threat Intelligence: Improve Cyber Security at the Tactical, Operational and Strategic Level"

This report provides guidelines for coordinated incident handling, including producing and consuming data, participating in information sharing communities, and protecting incident-related data by using SIEM IDS IPS tools & Open IOC, VERIS, Mitre Framework: STIX/TAXII.

Personal Project

- Freestacks – A Website of curated free developer resources for hosting. https://freestacks.netlify.app/
- Toolsea AI – A curated List of AI Tools and there Benchmark. https://toolseaai.netlify.app/
- DawnFit App – A wellness and productivity application.
- Market Metrica – A real-time Crypto Price Tracker. https://cmetrica.netlify.app/
- Hackunderroot – A blog for ethical hacking, and cloud security. https://hackunderroot.blogspot.com/
